EXPERIENCE

Java/React Software Engineer

Eurafric Information

- 09/2023 - Present | Casablanca - Morocco
- Led multiple projects from conception to delivery
 - Collaborated with a cross-functional team to develop scalable enterprise software solutions, ensuring efficient system performance and reliability
 - Designed and maintained complex batch processing workflows using Spring Batch, streamlining data handling for critical operations
 - Diagnosed and resolved software issues and bugs, minimizing disruptions and enhancing system stability
 - Supervised and mentored a team of interns throughout development projects
 - Deployed projects using various tools such as WebSphere, Jenkins, and command-line interfaces

Java/React Software Engineer

Falhi Voyages

- 04/2021 - 08/2023 | Marseille - France (Remote)
- Géré le département IT, supervisant le développement de logiciels
 - Développé des solutions logicielles adaptées aux besoins opérationnels et commerciaux
 - Administré et optimisé des bases de données relationnelles, assurant une gestion fluide et fiable des données.
 - Créé et déployé des interfaces web modernes et réactives avec React.js et Next.js, améliorant significativement l'expérience utilisateur.

Web Developer

Softechers

- 01/2021 - 03/2021 | Marrakech - Morocco
- Contributed to web development projects as part of a team

Web Developer

Green life Marrakech

- 07/2020 - 12/2020 | Marrakech - Morocco
- Developed and deployed a hotel reservation website and administrator dashboard.
 - Implemented an intuitive interface for clients and provided efficient management tools for managers.

EDUCATION

Engineer's Degree, IT Engineering and Network

EMSI Moroccan School of Engineering Sciences

2021 - 2023 | Marrakech - Morocco

Professional Bachelor's Degree, Computer Science

UPM High School Of Computer Science Applied To Management

2020 - 2021 | Marrakech - Morocco

Specialized Technician Diploma, IT Development Techniques

ISTA Specialized Institute of Management and Information Technology

2018 - 2020 | Marrakech - Morocco

High School Degree

Zerktouni High School

2016 - 2018 | Marrakech - Morocco

SUMMARY

Software Engineer specializing in Java, Spring Boot, React, and Angular, with 5 years of experience building scalable web applications. Skilled at developing clean, efficient, and maintainable code across front-end and back-end systems, and in leading projects. Strong background in agile environments, remote collaboration, and cross-functional teamwork. Fluent in English and open to remote or relocation opportunities in global markets.

SKILLS

Java	Spring Boot	React	Angular
Spring Batch	Spring Security		
Spring REST	Spring Data JPA		
Spring Cloud	Maven	JavaScript	
TypeScript	Next.js	MySQL	MariaDB
Testing	Rest API	GraphQL	Soap
Git	Jenkins	SonarQube	WebSphere
Apache	Docker	RabbitMQ	UML
Scrum

Honoris Online Academy

PROFESSIONAL PROJECTS

Open a bank account entirely online (Agence directe)

Eurafric Information

This project is a comprehensive digital platform that allows users to open a bank account entirely online, eliminating the need to visit a branch. Through secure digital verification and guided steps, the project offers a fully remote account opening experience, making banking more accessible and flexible for users—anytime and anywhere.

The project includes three main websites:

- A client-facing site where users can view profiles, explore available offers, and create a bank account online.
- A dashboard for administrators and agents, enabling them to track statistics related to account creation requests.
- A Strapi dashboard used by content managers to manage the site's text and images.

DGSN Web Service (My Digital Identity)

Eurafric Information

This web service acts as a middleware between projects and the DGSN system, facilitating the authentication of Moroccan residents and access to their official information (name, date of birth, etc.) from the government database.

Automatic Follow-Up Call

Eurafric Information

This batch is part of a process designed to re-engage customers who started opening their account online but did not complete the process. It targets those who meet specific criteria by calling them through an automated bot.

Web Service Monitoring

Eurafric Information

ServiceMonitor is a system that monitors critical services and alerts the team in case of outages. It uses scheduled cron jobs, supports manual checks via an API, and sends summary emails to ensure rapid incident resolution.

Excel Report Generation

Eurafric Information

Automated export of large datasets from the database to Excel via Spring Batch, with cron-scheduled executions to meet reporting needs.

Batch processing of data and conversion for analysis

Eurafric Information

This project is a batch processing system that extracts, maps, and converts data from a complex database into a specific format for the analysis team. Built with Spring Batch, it operates on a scheduled basis for efficient and timely processing, facilitating workflows and data-driven decision-making.

Online Flight Booking Platform for Agency and Amadeus Flights

Falhi Voyages

A web platform that allows customers to book flights online, either through the agency or the Amadeus system, without the need to visit in person. It provides a simple and accessible experience for comparing and choosing the best travel options.

Management and Booking Dashboard

Falhi Voyages

This project is an all-in-one dashboard designed to optimize travel agents' operations. It allows flight bookings, provides access to essential information (schedules, reservations, passengers, insurance, etc.), and enhances agent productivity, thus facilitating the management of customer needs and service delivery.

Hotel Reservation and Management System for Clients and Agents

Green Life Marrakech

This project includes two main websites: A client-facing site that allows users to browse hotel rooms, special offers, available services, and make reservations. A dedicated dashboard for agents, enabling them to manage and confirm reservations, administer hotel services, set room prices, manage special offers, and view statistics in graphical form.
